

Team name: StackOverflowes <3308SP21_024_1>

Sean Fitze:: git username: scfitze

sefi1880@colorado.edu

Hometown: Colorado Springs

major: CSCI year: Junior Dream Vacation: Anywhere where there's not COVID

Application Idea: Scheduler app (organize classes and class interfaces, zoom links)

Ethan Samuel Bauer:: git username: EthanSamBauer

ethan.bauer@colorado.edu

Hometown senior: Idaho Falls Idaho

Major: physics Year: Senior Dream Vacation: Japan

Application Idea: Build a Website- Lost and Found (forum possibly)

-1st Sprint (Dummy Sprint)

Mark Davis:: git username: gaguyga

wida0050@colorado.edu

Hometown: Alto Georgia

Major: Computer Science Year: Transfer Dream Vacation: Netherlands or something

Application: Bookstore app (shopping cart, product selection, etc)

-1st User Story (Located in Dummy Sprint)

Grace Horton:: git username: gracejang42

grho5175@colorado.edu

Hometown: Atlanta Georgia

Major: Computer Science Year: Transfer Dream Vacation: South Korea

Application Idea: Mental Health App (Medication reminders, breathing exercises, meditation playlists etc..)

- Scribe
- Created Jira Page (Jira Admin)

Application Ideas and Rank: 1) Build a Website: A forum type website that connects to a cloud, 2) Scheduler App: organizational tool that uses a web-scraper pod to collect necessary passwords and interact with student interfaces, 3) Bookstore app: a website hosted by the "store" and accessible by students/potential buyers, 4) Mental Health App: a mobile application hosted on the phone iOS

Hi Sean Fitze,

You're almost done! Make sure you verify your email address and we'll finish setting up [your site](#) for you. And thank you for choosing Atlassian!

[Yes, verify me!](#)

Unleash your team's potential

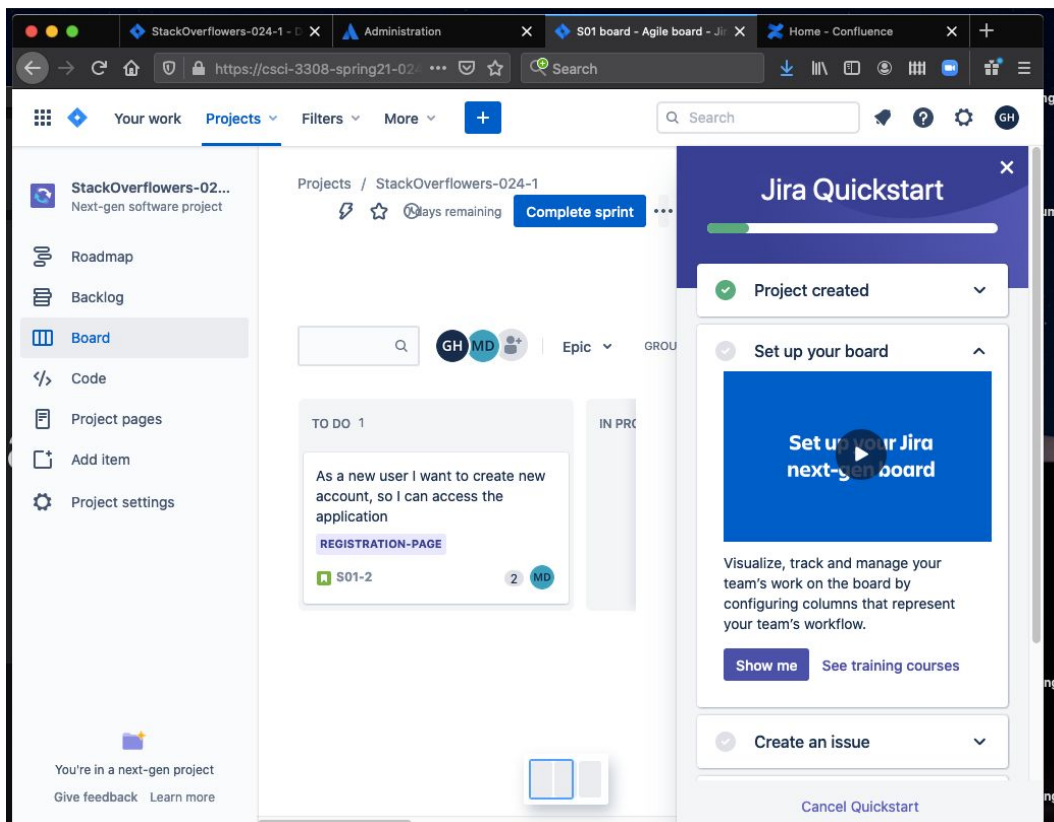

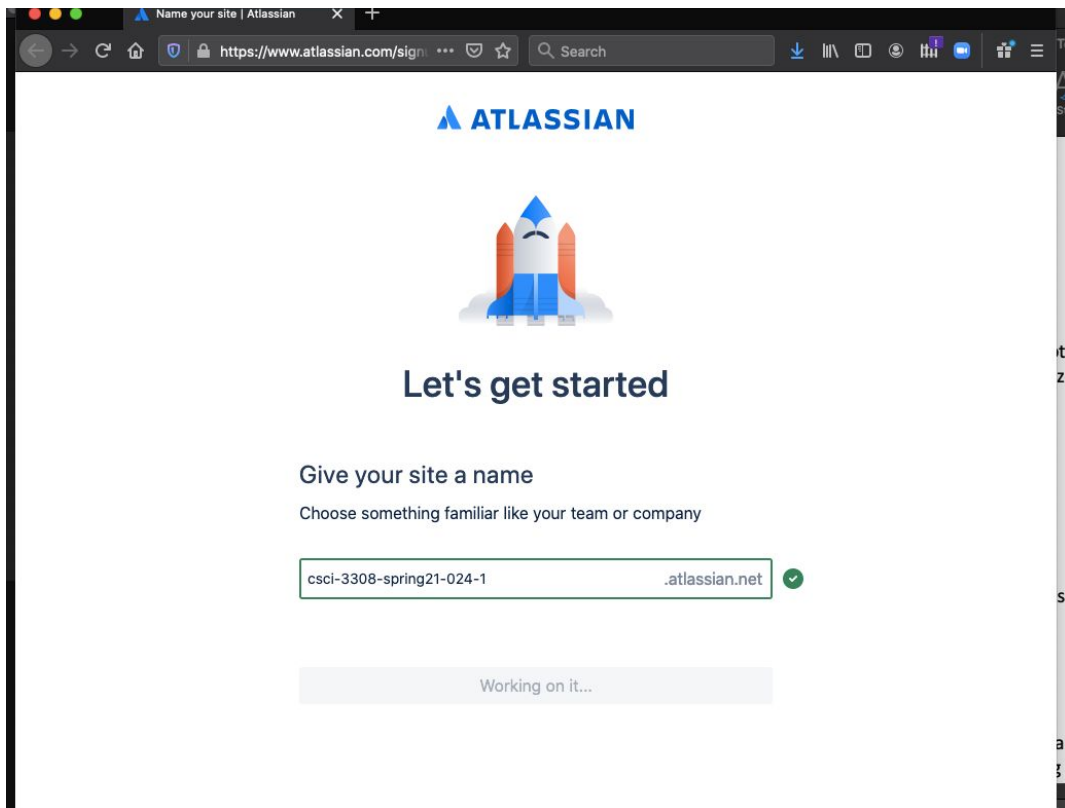

Hi Ethan,

Congratulations! [Your site](#) is all set up and ready to go! We can't wait to see what you can do.

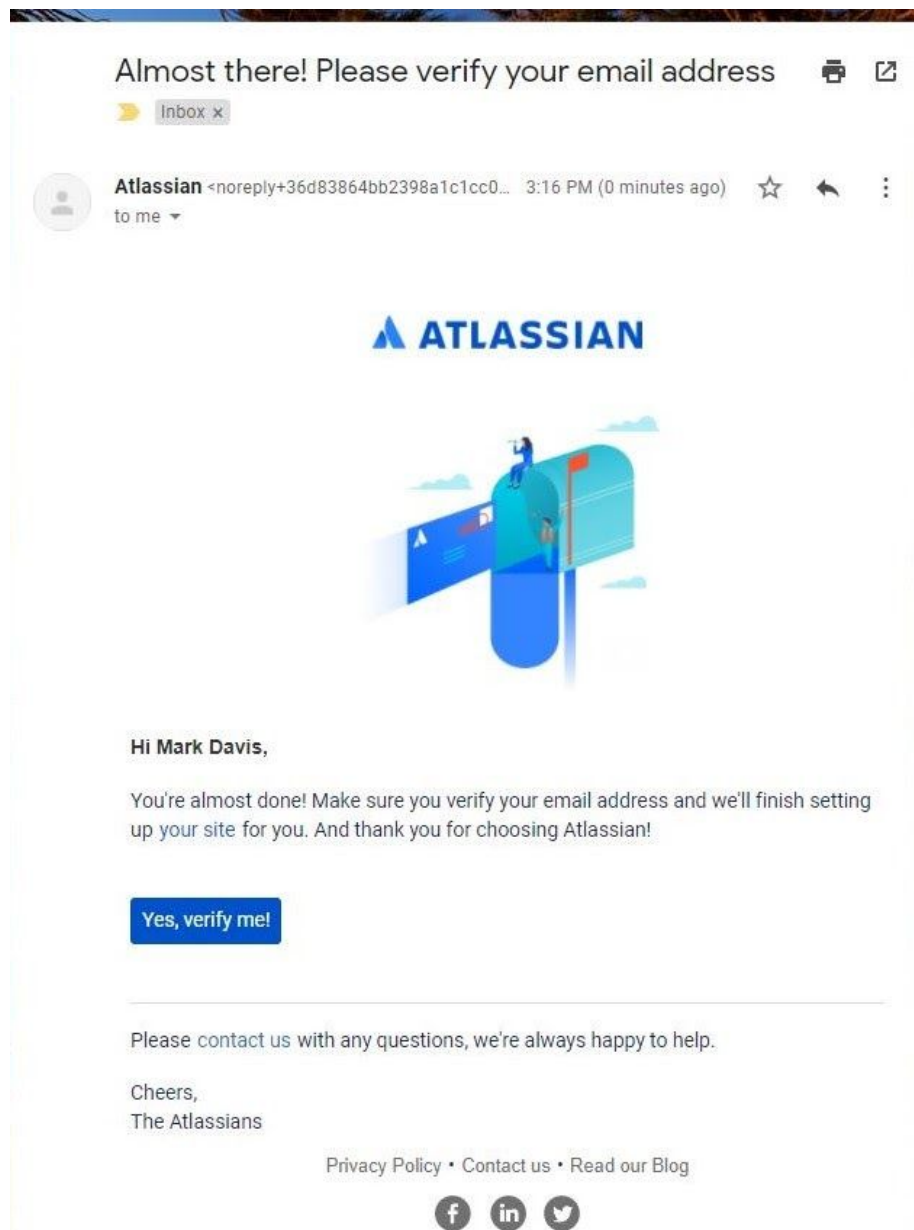

[Start working smarter](#)

Project: NoteSquad.com

Webpage: Notetaker/Resource Depository (CU Local)

Requirements:

- User/Login
- Upload/Download
- Search Feature (users search for users)
- Communication feature (inbox, comments, messages)
- Basic Profile (minimum requirements: Name, Major, Email, list of current classes)

Project Description:

NoteSquad.com is a CU Network based webpage for students to exchange resources, notes, and find notetakers. This webpage will make it easier for students, especially long-distance/remote learning students, to find notetakers and study material, all in one place.

The students can make a profile which contains their contact information, major, and a list of their current classes. The search feature makes it easier for students to find what they're looking for quickly, whether it be a notetaker, note taking jobs, or study material relevant to their current courses and major.

Overview of Application Architecture

NoteSquad.com uses the CU Network Infrastructure to protect access to individual student profiles, which are hosted locally on the students PC. The search function retrieves profile information and documents from a relational database and returns them to the students local profile.

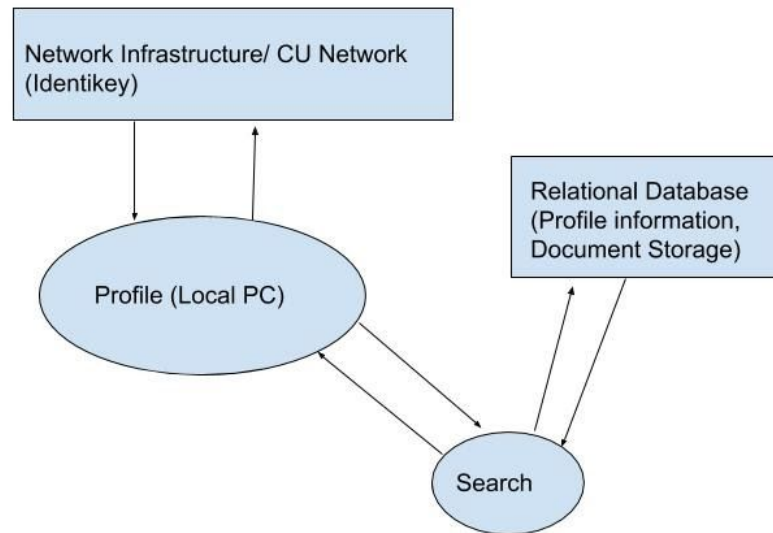

Vision Statement Draft:

- For: Students, anyone who wants to share or get notes for a class.
- Who: University of Colorado students only (for now)
- The Note Squad is a website that aims to provide students in need with a way to easily access valuable notes for their classes written by their peers and fellow classmates.
- Unlike regular methods of providing notes, our product will allow easy access to a wide variety of class notes and a way to connect our users to other students and peers.
- “To improve college students' lives and experience by providing a platform for note-takers and other students to connect and share.”
- “Our vision is to create a user-led repository of notes and class materials to optimize a student’s academic experience.”

Vision Statement:

The NoteSquad is a website that aims to provide students in need with a way to easily access valuable notes and important information for their classes written by their peers and fellow classmates. Our vision is to create a user-led repository of notes and class materials to optimize a student’s academic experience.
